

EE 154 Laboratory 1

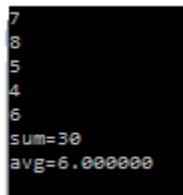

Question1:

Write a C program to find average of 5 numbers entered by the user.

```
#include "stdio.h"
#include "conio.h"

int main() {

    // find average of 5 numbers entered by the user.
    int n=0 , num , sum;
    float ort ;
    sum = 0 ;
    while (n<5) {
        scanf("%d" , &num );
        sum = sum + num ;
        n++;
    }
    printf("sum=%d\n" , sum );
    ort = (float)sum / 5 ;
    printf("avg=%f\n" , ort );
    getch();
    return 0;
}
```

```
7
8
5
4
6
sum=30
avg=6.000000
```

Question2:

Write a C program to find max of 5 numbers entered by the user.

```
5
max=5
2
max=5
7
max=7
3
max=7
9
*****max=9
```
